# Cost and Limitations for My Vision Express ver.2014

## Capability and Description

2014 Edition criteria applicable to My Vision Express Version 2014

My Vision Express Version 2014 is a server and cloud based EHR that supports healthcare professionals in optometry including outpatient ambulatory environments. . It allows users to perform a wide range of functions such as to: *document, review, and edit patient health information including but not limited to problem lists, medication lists, medication allergy lists, family health history, and all aspects of the patient's eye exam, perform CPOE (computerized provider order entry) for medications, laboratory orders and imaging procedures, electronically create prescriptions and prescription-related information for electronic transmission to pharmacies, measure CQMs (clinical quality measures) and to export these in standard file formats, be alerted to possible CDS (clinical decision support) interventions, and Report information to PHAs (public health agencies) and clinical data registries.*

My Vision Express Version 2014 is designed to allow direct integration with diagnostic imaging and other diagnostic testing devices, or indirect integration with such devices via a third-party PACS (picture archiving and communication system).
