

myCare | iMedicWare Analytics

EYE CARE LEADERS  **THE RIGHT DATA AT THE RIGHT TIME, RIGHT NOW.**

Easily facilitates the capture and examination of crucial data from all areas of your practice to provide detailed analytics reports for a thorough evaluation of your practice's performance.

Increase regulatory compliance, ensure you are on financial track, review staff efficiency reports, and track inventory and financial reports for your optical shops with myCare iMedicWare Analytics.

myCare iMedicWare Analytics captures the right data needed to give you insight into your practice's performance and help you achieve your growth goals.

Data is pulled from all areas of your practice including the myCare iMedicWare EHR, PM, ASC, and more to provide a comprehensive analytics view.

DETAILED

GRANULAR REPORTS

that provide the data you need to ensure you are meeting your practice's needs and goals.

myCare iMedicWare Analytics give you high-level analytics—structured in an easy-to-read-format—in the following areas:

FINANCIAL:

The Financial Dashboard generates interactive graphs to help you visualize your current situation and plan for the future. Schedule selected financial reports for a specified frequency to ensure you are regularly meeting your financial goals. Review the day sheet to help balance your day and identify missing payments. Dive into the analytic features to review what has been billed versus and what was paid/written-off, see which patients have paid too much, and gain more insight into insurance claims and payments.

PATIENTS OVERVIEW:

Keep patients coming back with the lost to follow-up report. And daily, monthly, or yearly scheduler reporting capabilities allow you to check the amount of time it took to see a patient.

OPTICAL:

Inventory and financial reports give insight into how your optical shops are performing.

HUMAN RESOURCES:

Efficiency reports lets you see which techs are most efficient and productive.

STATUTORY COMPLIANCE:

Monitoring of compliance with federal programs, such as MIPS, Meaningful Use, and automatic filing with the IRIS registry. You'll begin to move from reporting for compliance to reporting for insight with tools such as a MIPS scorecard to check ACI performance score automatically and a dashboard and audit reports regarding Meaningful Use.

Make the right decisions for your practice, starting with getting more information about myCare iMedicWare Analytics.
