EYE CARE LEADERS

EHR Designed for Eye Care

Cloud-enabled EHR and training to provide faster and better care to your patients.

Developed in an intensive clinical setting and built exclusively for eye care practices, **myCare iMedicWare Electronic Health Records** elegantly addresses the real needs of practicing eye care professionals. Intuitive and easy to learn, it matches your existing workflow so well, your staff will immediately know where they are in the patient encounter.

myCare iMedicWare EHR has been designed to be used on an enterprise level, where organizations with multiple practices and business entities can quickly and easily utilize one single system for all of their needs.

Features including subspeciality specific tools such as glaucoma, retinal, and refractive flow sheets, editable charts post patient's visit, ability to view multiple test images, and more make this eye care specific EHR a key addition to your practice.

An all-inclusive, eye care specific designed, cloud-based EHR that optimizes clinical, financial, and operational alignment across your practice or multiple practices and business entities if needed.

Customization, support, and constant improvement are focal points for every practice.

We believe our clients deserve the same quality in an EHR partnership as they provide to their patients, which is why we strive to customize, support, and improve myCare iMedicWare EHR for each client. We will develop recommendations and set you up with an EHR expert who will help you implement myCare iMedicWare EHR in a way that fits your practice and allows you to see results right away. Best of all, it provides a seamless workflow with all parts of the entire myCare iMedicWare solution—from PM to Revenue Cycle to Optical and more.

Don't be held hostage by your current EHR provider with scare tactics around data conversion costs and workflow interruptions.
With myCare iMedicWare, you can expect:

An efficient transition through a customized approach to data migration, staff training, and go-live.

Easy-to-use software that ensures no lost revenue or declining cash flow due to your new EHR purchase or conversion.

Trust in the transparent value pricing that spares you start-up costs, in-house technical expertise, and sizable capital expenditures.

Work/life balance and peace-of-mind from secure access to patient records and other data anytime with complete mobile access.

Comprehensive technical support to ensure your practice is always running smoothly.

Built-in compliance with automatic filing of PQRS requirements with the IRIS registry and ICD-10 coding along with an easier way to handle MIPS reporting—all ensuring you receive the reimbursement you deserve.

myCare iMedicWare EHR offers a user-friendly interface with minimal clicks that will enhance both staff and patient experiences.
