A Complete View of Your Practice's Efficiency

You run a busy practice and need to run as efficiently as possible. Automatically access your patient flow to review and improve productivity.

myCare iMedicWare iMonitor tracks patient and staff movement within the office, highlighting potential bottlenecks and improving patient efficiency while decreasing patient wait times. This leads to both happier patients and staff.

To understand how to improve your practice's efficiency, you need to take a closer look at the upcoming patients for the day and how they end up moving throughout your practice. This data is easily accessible since all components of the myCare iMedicWare iMonitor solution are integrated to share data. Once you understand how your practice is currently running, you can gain insight into how to make it run more efficiently.

myCare iMedicWare iMonitor is part of the myCare iMedicWare solution which offers the only completely integrated cloud-based solution that specializes in eye care.

START

improving
efficiency now

Examining your patient flow is the first step in improving your office efficiency. The data elements to review include:

Identify the location and status of each checked-in patient

Oversee exam lane utilization and assigned physician

View dilation and testing duration

Receive extended wait time alerts

Track average visit and wait time to create detailed efficiency reports to determine areas of improvement

myCare iMedicWare is the only completely integrated cloud-based solution that specializes in eye care. You can rest easy knowing we've taken into account all of the unique needs of your practice and applied them across the entire suite. From EHR to Optical to ASC to Revenue Cycle Solutions, myCare iMedicWare focuses on great office workflow, so you can focus on great patient care.

“ From a management perspective, myCare iMedicWare iMonitor allows us to clearly track, among other things, physician productivity and patient processing, which are key indicators in our business. ”

— **Neil S. Levinbook, Esq.**, Chief Operating Officer of
Vision Center Network of America. Long Island Ambulatory Surgery Center, LLC.
