Eye Care Leaders understands the requirements inherent to a busy ophthalmic ASC and designed an EHR to streamline administrative and clinical processes.

Your ASC’s clinical outcomes are better when communication is simple and clear. myCare iMedicWare ASC enables your entire staff to work as a team throughout the patient’s ASC experience—from check-in through post-op—and with the convenience of an iPad.

Tailored for Ophthalmic ASCs with the opportunity for further customization. Leverage custom-made templates for common ophthalmic procedures like cataract surgery and laser-vision correction.

myCare iMedicWare ASC delivers improved efficiency and profitability now, while also preparing you to meet upcoming CMS requirements for ASCs.

Create better workflows and maximize your operational efficiency with ECL’s flexible and customizable EHR for ASCs. Preference cards, surgical procedures, standing orders, RN checklists, CRNA checklists, intra-operative checklists, and operative notes are easily set-up and maintained.
Your ASC could be more efficient, profitable, and competitive. myCare iMedicWare ASC can get you there.

**BENEFITS**

**Staff Productivity and Patient Satisfaction**
With myCare iMedicWare ASC, your staff is equipped with the tools and training they need to process patients quickly. And your patients will enjoy a calm, smooth administrative process as they prepare for and recover from their procedure.

**Powerful and Customizable**
Your staff can customize surgery templates to fit their preferences and enter surgery data at the patient's bedside, so all crucial information is in one place. All information is right at your fingertips to create benchmarks, analyze costs, and review historical data.

**Compliance and Reporting**
myCare iMedicWare ASC protects your ambulatory surgery center by decreasing medical errors and reducing your risk of liability. Our systems help your ASC provide the kind of care that helps you ace AAAHC and other accreditation organization surveys.

**myCare Integration**
Clear and complete surgery-day information from myCare iMedicWare ASC integrates with your PM. As a result, you have everything you need for post-surgical follow-up visits back in your office.

**FEATURES**

**Pre-Op Nursing**
myCare iMedicWare ASC enables the preop nurse to enter medications and pre-op vital signs, go through a pre-op checklist questionnaire, start the I.V. block, and fully prepare the patient for the surgical procedure with minimal clicks of a mouse.

**Intra-Op Documentation**
The intra-operative screen is fully customizable by surgeon/by procedure. It provides input areas for the circulating nurse to enter content during the procedure. The CRNA has simultaneous access to the system and is able to go to the appropriate screens to continue to document the vital signs.

**PAR Calculations**
PAR Score Sheet can be accessed by the CRNA and completed as part of the final documentation. This can then be merged into the nursing and anesthesia reports. All required documents are generated immediately from the information captured at various during the process.

**Workflow Management**
myCare iMedicWare ASC has a user-friendly "dashboard" screen that can be accessed from any workstation. The screen shows exactly where your patients are in the process. When a patient moves from one room to another, you simply drag the patient from that location to a new location.
