

Performance Year 2019

This notice is to attest that the 2015 edition CEHRT myCare iMedicWare Version R8-V1 is certified to criterion

170.315 (g)(7): Application Access - Patient Selection,
170.315(g)(8) Application Access – Data Request and
170.315(g)(9) Application Access – All Data Request

and as such ensures that its users are provided the means by which to fully enable the API functionality such that any application chosen by their patient would enable the patient to access their individual health information, provided the application is configured to meet the technical specification of the API.

The Patient Access API functionality is available to myCare iMedicWare EHR users and patients having access to the patient portal.

- The Developer Application Documentation is available at
<https://eyecareleaders.com/solutions/mycare-imedicware/>
- The API test application can be used to demonstrate that the Patient Access API is available and implemented. The API test application URL is:
<https://eclimedicware.com/elearning/APITEST>
- The iDOC URL is:
<https://eclimedicware.com/elearning>

Questions regarding the Patient Access API's use should be directed to myCare iMedicWare Support at iMWSupport@eyecareleaders.com
